

BOIL WATER ORDER NOTICE

For the Town of Brunswick, New York

It is ordered that you boil your water before using.

Bring tap water to a rolling boil, boil for one minute, and cool before using. Or use bottled water certified for sale by the New York State Department of Health. Boiled or bottled water should be used for drinking, making ice, washing dishes, brushing teeth, and preparing food until further notice.

This Boil Water order applies to all homes in the Town of Brunswick Water System.

Because of a major water main break in Troy, The Town of Brunswick will be required to issue a boil water order starting tomorrow, June 13, 2019. There will be announcements on the news outlets regarding the duration of the boil water order and we will post additional information on our website and facebook page.

When water mains lose pressure it increases the chance that untreated water and harmful microbes can enter your water.

Harmful microbes in drinking water can cause diarrhea, cramps, nausea, headaches, or other symptoms and may pose a special health risk for infants, some elderly, and people with severely compromised immune systems. But these symptoms are not just caused by microbes in drinking water. If you experience any of these symptoms and they persist, you should seek medical advice.

It is ordered you boil your water for the next 72 Hours. This is a precautionary measure and is required by the State of New York Sanitary Code for your protection. You will be informed when the boil water order is lifted. For additional information please go to.
