Area Variance Continued

1. Explain how no undesirable change will be produced in the character of the neighborhood; nor a detriment to nearby properties created by granting the Area Variance.

The proposed deck addition is only 4' wide off existing structure. The addition will not impeded any further than existing structure toward Setbacks.

2. Explain why the benefit sought by the applicant cannot be achieved by some method, feasible for the applicant to pursue, other than an Area Variance.

The easment from the center line of Seneca St. lands 5' from the existing home, requiring an area variance for almost any proposed additions to home.  
Property is existing non conforming trying to make conforming

3. Describe whether the requested Area Variance is substantial.

I do not believe the area variance is substantial as the proposed deck is rather small (80sq').

4. Explain how the proposed Area Variance will not have an adverse effect on the physical or environmental conditions in the neighborhood or district.

The proposed area variance will not have any adverse effects on the physical or environmental conditions of the neighborhood or district as the deck is a simple wood framed deck attached to existing enclosed porch. Other homes in the area have decks

5. Explain whether the difficulty is self-created. (Consideration is relevant, but shall not necessarily preclude the granting of the Area Variance)

I do not believe the difficulty is self-created as the set back on the front of the home lands 5' from the existing structure, requiring area variance for an addition to property within 25' of setback
